FLUTTERBY FIELD SCHOOL · MODULE 2 · COMPUTER OPTIONAL

AI Rule Card

Names _____

INSTRUCTIONS

1. Look at the class beak data (or the sample table).
2. Write a short rule a computer could follow to predict **Wetland** or **Forest**.
3. Circle up to 4 features you would give an AI. Cross out useless ones.
4. Predict the mystery birds, then check answers with your teacher.

Our prediction rule

If _____

then habitat = _____

Else habitat = _____

Features we would give a computer (circle up to 4)

Beak length · Beak width · Beak color · Wing length · Seed score · Worm score · Water score · Body weight · Temperature

Features we would *not* give it (and why)

because

Mystery bird predictions

Bird	Our prediction	Actual	Right?
1			
2			
3			

When we were wrong

We think the miss happened because
